JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

ROCKFORD, ILL.**MILK—PRODUCTION, CARE, AND SALE.**

All samples of milk and cream collected shall be tested for the addition of water and preservatives, the removal of cream, the presence of dirt, and the percentage of butter fat, and total solids. Samples showing the presence of dirt when run through a sediment tester shall at once be condemned as dangerous to the public health, even though the percentage of butter fat and solids be above standard. The farmer from whom this dirty milk is received shall be forbidden to bring his milk to the city for sale until all rules of the dairy inspection are complied with and his milk meets the approval of the health commissioner.

Ice cream shall be collected from time to time from the various dealers and ice cream cone wagons, and tested for the percentage of butter fat. At irregular intervals the ice cream factories shall be given a thorough inspection.

Milk wagons shall be stopped on the streets whenever seen by the inspector, and the contents of the cans, the floor of wagon, ice tank, and the general conditions carefully scrutinized and reported to the department of health; if found defective, a letter of instruction shall be sent to the owner, with time specified to comply with same.

Milk bottling plants shall be inspected from time to time and the condition of utensils, employees, and the general method of handling milk carefully investigated and reported to the commissioner of health.

Dairies supplying milk to the city of Rockford are subject to inspections of cows, stables, milk room, handling of milk, condition of water tank, storage, and method of transportation. A detailed score card as recommended by the Government is used in the inspection of dairies and the score of each farmer or dairyman shall be kept on record at the office of the department of health open to public examination.

Milkmen are forbidden to receive milk or cream from farms or dairies whose score is below 49 on the health department's records. While the scoring is being done, instructions shall be given the owner of the dairies so that he may improve the score of his dairy. Any dairy refusing to comply with the rules of the dairy inspector shall have his milk taken off the market and condemned as unsanitary, or any milkman who, after having been notified of the condemned dairy farm, shall persist in purchasing milk or cream from a condemned dairy farm shall at once have all such milk or cream dumped by reason of its being unsafe for the public to use.

[Regulation, Department of Health, adopted Sept., 1911.]

YONKERS, N. Y.**NUISANCES.***Filling of lots, etc.*

SEC. 82. No animal or vegetable substance and no muck, silt, or dirt gathered in cleaning yards, buildings, docks, or slips, or waste of mills or factories, or any materials which are offensive, or tend, by decay, to become putrid or to render the atmosphere impure or unwholesome, shall be deposited or used to fill up or raise the surface or level of any lot, grounds, docks, wharf, or pier within the limits of the city of Yonkers, unless pursuant to a special permit from the health officer; and no ground or material filled with offensive matter or substance or that will emit or allow to arise through or from the same any offensive odor of deleterious exhalation shall be opened or turned up, or the surface thereof removed, between the 1st day of May and the 1st day of October in any year, except pursuant to a permit therefor first obtained from the health officer.

Stables.

SEC. 83. No person shall hereafter occupy or use any building in the city of Yonkers for a stable unless first authorized thereto by the health officer. The conditions upon which such permits are issued are:

1. The stable must be erected and completed in all its appointments.
2. The manure must be stored in tight receptacles and removed at frequent intervals.
3. The ventilation, lighting, and drainage of the stable must be satisfactory to the board of health.
4. The erection of the stable must be begun within 90 days after the date of application for a permit and prosecuted to completion.
5. The position of the stable must be in accordance with a plan on file in the office of the health bureau.
